COUNTY OFFICIAL PAPER

SOLDIERS' BONDS RECOMMENDED TO FINANCE COMMITTEE AS HARDING ASKED

ULSTER PREMIER ATTENDS IRISH PEACE MEETING

De Valera Expected to Resume Conferences With Lloyd George With Craig Attending

RIOTING CONTINUES IN STREETS OF BELFAST

Two Persons Were Killed and From 30 to 40 Wounded in Disturbances Last Night.

LONDON, July 15.—(U. P.)—Lloyd-George conferred with De Valera and Premier Craig, the second day of the Irish peace negotiation conference. He met De Valera in the morning and Craig in the afternoon. No statement has been issued, although Lloyd-George and Craig were closeted for over two hours. It is assumed they discussed the Irish settlement matter which Lloyd-George and De Valera had already discussed, attempting to bring the north and south of Ireland premiers together on an agreeable basis.

LONDON, July 15.—(Charles M. McCann, U. P. Staff Correspondent.)—Ulster was represented for the first time in the Irish peace conference when Ulster Premier Craig arrived to confer with Lloyd-George. De Valera is expected to resume his conference with Lloyd-George, possibly with Craig attending. Sinn Fein headquarters expressed the greatest optimism regarding the success of the second day's conference. In yesterday's meeting from its length, it is apparent De Valera and Lloyd-George obtained satisfaction, causing the belief that the negotiations progressed smoothly.

Will Hold Another Meeting LONDON, July 15.—(A. P.)—Another meeting between Eamon De Valera and Lloyd-George was held today for the discussion of the preliminaries of the hoped for Irish peace, lasting about an hour and a half. At the conclusion an announcement was made that conversations would be resumed later, probably Monday.

Military Resumes Control BELFAST, July 15.—(A. P.)—Military resumed control of the north Queen Street area today and armored cars patrolled the streets. Two persons were killed and from 30 to 40 were wounded in the rioting last night.

MINING FOREMAN TESTIFIES WASHINGTON, July 15.—(A. P.)—R. H. Kirkpatrick, former mine foreman at Mingo, W. Va., testified before the senate investigating committee that the mineowners had "framed up" false shooting episodes to procure the declaration of martial law "so they would break the strike."

SHERIFF ISSUES WARRANT FOR ARREST OF ROSEBURG DENTIST WANTED IN CONNECTION WITH DISCOVERY OF BURNING AUTOMOBILE

ROSEBURG, Ore., July 15.—(U. P.)—A warrant for the arrest of Dr. R. M. Brumfield, a dentist and a reward of \$200 for his apprehension, has been posted by Sheriff Stamer of Douglas county, following the discovery late yesterday of a burning automobile, from which a charred body was removed. The body has been identified as that of Dennis Russell, a laborer, whom Brumfield visited July 12 to obtain his services in blasting stumps from the Brumfield farm. A bloody and shot-torn hat found near the road was identified as Russell's. The body was clothed in Russell's clothing, but was wearing Brumfield's shoes and silver ring. The clothing of both men were found nearby. Blood was found on the river bank. Mrs. Brumfield insists the charred body is her husband's and others declare it is Russell. Both men are missing. Brumfield is known to have carried heavy insurance. A mysterious tangle envelops the deed. Recently Had Two Houses Burned Brumfield had two houses burn lately and recently bought a new place. It is not known whether he was heavily involved financially. He held a good standing and was one of the towns leading dentists. Following the time Brumfield declared he visited Russell, the dentist's car was seen pursuing an unrecourse on the highway near the place where it was found

COMBINE TRAVELS OVER WHEAT FIELDS SASSY AS REGIMENT ON PARADE

Machine Pulls Header That Clips Grain 24 Ft. Wide; Threshes as it Ambles Along.

(BY J. S. H.) "Wouldn't George Washington be surprised if he could drop back on this old earth and make a visit of a week or so?" There probably are few people who have not either heard or made that remark several times during the course of their lives when they have been flushed with a sense of superiority of the accomplishments of this twentieth century of ours over the successes that had been marked down to the credit of Americans in that early day when Washington lived. The chances are that George would have to rub his eyes several times, too, before he could be induced to believe that this present-day America is the same little country that he was daddy of when it started on its career. But while you're wasting a lot of unnecessary sympathy on George, here is a little poster that applies to 1921 and Pendleton: How many men and women live here who have never seen a big combine take wheat off of the stalk, convey it on canvases to the cylinders of a huge moving threshing machine, separate the grain from the chaff and deposit a red-brown stream of wheat in a wagon alongside and windrow the straw behind? Behind George Washington. Humph! I guess there are several who are in the same fix that I was in until yesterday afternoon, and believe me or not, I have an idea that you have a lot more sympathy coming to you for being behind the times than should be given George, because you must admit that he was certainly right in style on things that happened in his own day, and in some respects he established standards that we haven't been able to improve on even in this age. The desire to see a big combine outfit at work has been in the back of my mind as long as I've known the thrill of a wheat harvest, so when Dave Nelson, who farms a little 2000 acre patch three miles north of town, invited me out, I went right after the opportunity.

SCHOONER RAM MISSING; CREW OF GERTRUDE SAFE

SEATTLE, July 15.—(U. P.)—The Coast Cutter Bear reported the damaged schooner Gertrude beached near the East cape of Siberia. The Gertrude's crew is safe following the beaching of the vessel during the most violent storm that has struck the Bearing Sea this year. The schooner Ram, lost between Teller and Nome, Alaska, is now ten days overdue. The Bear is also hunting for this vessel. It is not known what cargo or how many passengers the Ram carried. Amundsen's crew from the Maud is on the Bear, and the vessel herself is in tow.

CLAIM MARINES LANDED CHICAGO, July 15.—(A. P.)—Claim that American marines have been landed at Tampico, Mexico, from the warships stationed there, has been made in a telegram addressed by the Federation of Railway Unions of Mexico to the socialist national headquarters.

THINGS WE'D LIKE TO DO, THIS HOT WEATHER

JAPS ARE PLAYING FOR TIME IS ONE THEORY ADVANCED

Explanation Given as Reason for Vagueness of Reply Accepting Harding's Invitation.

GOVERNORS OF 16 STATES INDORSE DISARMAMENT

Approve President's Conference and Think it Would Improve World's Economic Conditions

WASHINGTON, July 15.—(A. L. Bradford, U. P. Staff Correspondent.)—"Playing for time," authoritative quarters advance in explanation of the vagueness of Japan's reply accepting President Harding's invitation to participate in the disarmament conference. Some belief is that by neglecting to mention the far eastern discussion, Japan tacitly accepts its possibility and signifies her willingness in its participation. Governors of 16 states representing over 20,000,000 persons, indorsed President Harding's disarmament conference in an effort to prevent war and relieve tax burdens, would improve the world's economic condition.

Cannot Be Made Condition WASHINGTON, July 15.—(A. L. Bradford, U. P. Staff Correspondent.)—Japan asked the United States for an amendment of the proposed suspension of the Pacific problems in the forthcoming disarmament conference. It has been learned authoritatively, it was included in yesterday's acceptance reply. The United States is understood not to advise to similar questions regarding the conference purposes prior to the issuance of the formal invitation. Secretary Hughes it is understood is forwarding a reply to Japan, outlining this country's attitude, although the government it is understood will be unwilling to allow the far eastern discussion to be made a condition of Japan's consent to participate. She must accept the principle involved in the proposed discussion of the Pacific question.

TROOPS ARE CALLED OUT TO PROTECT DOCKYARDS KOBE, Japan, July 15.—(A. P.)—Troops were called out today after thousands of striking dockyard workers had charged the police cordon in an attempt to take possession of the dockyards and carry out their project for their control by this vessel. A number of the strikers were wounded, and the ringleaders were arrested.

EARTH DISTURBANCES REPORTED IN VIRGINIA BRISTOL, Tenn., July 15.—(U. P.)—Severe earth disturbances are reported from Mandottia, Va. Several acres of ground were heaved up, in some places and sunken in others. Large breaks in the banks of the river occurred.

U. S. IS MENACED BY EPIDEMIC OF PELLAGRA WASHINGTON, July 15.—(U. S. S.)—The United States is menaced by Pellagra, which is spreading at alarming rate, particularly in the southern states, according to a statement of the public health service issued.

MRS. KABER ON VERGE OF ANOTHER COLLAPSE

CLEVELAND, July 15.—Mrs. Kaber, the alleged husband slayer, was almost carried into the court room on the verge of another collapse.

Her moans nearly caused another panic in the crowded court room. Restoratives were applied by court attendants. She leaned on the shoulder of the deputy sheriff who sat beside her, moaning: "Don't leave me, don't leave me!" "I want to tell all," she kept moaning. "I want to tell all but Corbin's chief counsel would let me." As an alibi was testifying, the accused woman, sitting in a huddled heap, suddenly moaned, "Oh, God, help me!" The defense closed the evidence shortly after this afternoon and the state began the closing arguments. Mrs. Kaber was carried into the court room in a fainting condition by three deputies. Restoratives were applied.

LEGISLATION OF BILL KILLED FOR PRESENT SESSION OF CONGRESS

UKIAH CATTLEMEN TO SHIP TRAINLOAD OF CATTLE TOMORROW

A trainload of cattle, all fat killing stuff, will be shipped from Pilot Rock tomorrow to go on the Portland market, it became known today. Dign Clark, livestock agent of the O-W. R. & N. of Portland was here today making arrangements for taking care of the shipment.

Between eight and ten shippers will have cattle on the train from the Ukiah district and this is their annual shipment. Heavier movements of livestock are expected during the coming two or three months, according to Clark. The heavy shipping season of lambs has started now, and within the next two weeks it is expected that lambs produced on the ranges of Eastern Oregon will be moving in large numbers.

CARPENTER SAILS FOR HOME NEW YORK, July 15.—(U. P.)—George Carpenter sailed for France yesterday, planning to return for the Columbus day match with Tommy Gibbons.

PENDLETON ROUND-UP IS DEFENDED BY GOVERNOR The Pendleton Round-Up is characterized as one of the finest and most thrilling exhibitions in the world and one of high educational value in a letter from Governor Ben W. Olcott to Dr. W. C. Stillman, president of the American Humane Association, who wrote the governor asking "Ought not the better element of society to stand against the savage and cruel parts of these shows and demand their elimination?"

Dr. Stillman, in his letter, says that "steers are violently thrown so as to break bones and cripple them; saddles have sharp objects put under them to cause bucking, and men have been injured or killed." In reply, Governor Olcott says: "If all round-up shows were conducted on the high plane of the Pendleton show I certainly could not agree with your intimation that the better element should demand their elimination. As to the passing 'fly-by-night' wild west shows, which occasionally go through the country I know nothing. But I do know Oregon unquestionably has the greatest, the best and the most interesting Round-Up there is in existence and one well worthy of preservation and continuation."

"I might say that it has been a practice for agents of the Oregon Humane society to attend the Pendleton show every year, usually under the direction of the executive office," Governor Olcott said. "On but very few occasions has it been necessary for such agents to in any way interfere, and then they did so only as to minor particulars."

WOMAN IS FOUND DEAD ON FLOOR OF KITCHEN SEATTLE, July 15.—(A. P.)—The body of the wife of Clarence L. Deames, former special assistant attorney general, was found early today in the kitchen. Death was due to asphyxiation. The police said Deames found a note which he declined to turn over to the officers. The coroner is investigating to determine whether she committed suicide.

PREMIER SAYS JAPAN WILL SPARE NO EFFORT TOWARDS SUCCESS OF HARDING'S IMPORTANT EPOCH MAKING CONFERENCE BY JAPANESE PREMIER HARA (Copyright.)

TOKYO, July 15.—(U. P.)—"Japan will spare no effort toward the success of President Harding's important, epoch making conference. Japan will come to the opportunity to vindicate her position before the whole world and show once more how thoroughly she sympathizes with the new world spirit. President Harding's proposal was received enthusiastically by Japan which welcomes any plan to promote world-wide peace and the welfare of the world. She is confident much good will result from the proposed gathering of nations, both for international relationships generally and the friendship of America to Japan particularly."

CATTLE REMAIN STEADY. PORTLAND, July 15.—(A. P.)—Cattle are steady; hogs are \$1 higher, prime light \$12 to \$13; sheep are slow; eggs are firm. Butter is two cents higher, extra cubes 25 cents and 40 cents.

EXTENSION OF CITY WATER SUPPLY NEARLY FINISHED

Million or More Gallons Will be Added to Daily Flow When Project is Finished.

INSPECTION OF SOURCES SHOW WATER TO BE PURE

Pendleton Uses More Water Than Any Other City of its Size in U. S. Says Engineer.

A million or more gallons of water will be added to Pendleton's daily water supply at the end of two weeks when the 1400 foot extension to Chaplin Springs, 20.4 miles east of Pendleton is completed. Water from the extension is now being used in Pendleton but with the completion of the project the supply will be much augmented. Measurements made yesterday at Thorn Hollow by Frank Hayes, city engineer, showed that the total flow of water from Chaplin, the extension and Thorn Hollow Springs, 17 miles east of here, was 2,600,000 gallons. This is about evenly divided between the three springs. The new extension, which is being built by the water commission at a cost of about \$10,000, is constructed in such a way that the water, which bubbles cold and crystal clear from the spring is not touched by daylight until it reaches the reservoir in this city. This same feature is true of the water from Chaplin Springs proper and Thorn Hollow Springs, which water is joined by the water from the extension and which flows through one main pipe to Pendleton.

Water Is Pure Recognized authorities advise that water which comes from underground should be kept covered, to preserve its purity and this is an important point in the construction of the Pendleton system. The pipes are sunk eleven feet in the ground, with a "T" at every 50 feet, covered by loose boulders. The water rises and runs into the open joints and "T's". The water, which runs at a rate of 800 feet in seven minutes, touches no vegetation. Four manholes will permit circulation of air.

Of the 1400 feet of extension, 950 have been completed. Mr. Hayes is superintendent of the work and the 24 men employed are under the direction of William Rabaud, foreman. The work has been underway since April 4. Some delay was caused when it was necessary to tunnel under the railroad track near the place where the extension waters join those of the Chaplin itself.

Sources Are Pure Inspection of the sources of the water supply of Pendleton shows, they say, that the water gushes from the springs directly to the pipes and there are no open pools to breed disease. The water is very cold and clear. The springs of the extension extend for a distance of about 500 feet. The water in the pipes from Chaplin and Thorn Hollow is about two feet in depth.

Pendleton uses more water than any town of its size in the United States. (Continued on page 2)

THE WEATHER

Reported by Major Lee Moorhouse, weather observer.

Maximum, 83. Minimum, 56. Barometer, 29.70.

TODAY'S FORECAST. Tonight and Saturday fair.
